REMARKS

The references listed in the attached PTO-form 1449 were brought to the assignee's attention by a third party. In particular, the third party characterized the newly submitted references as follows:

However one of our concerns is that arguably the slim client architecture described above maybe anticipated by, for example, the Walker patent either on its own or when read in combination with some or all of the additional art listed below. For instance, claim 1 of the Walker patent refers to the use of a "central controller" (gaming server) and "input/output devices" (client gaming devices). Furthermore, the Walker patent refers to the exchange of gaming related data between the server and clients (I/O data).

While the Assignee does not believe these references to be material, out of an abundance of caution, the Assignee is hereby submitting these references (along with the disclosing third party's characterization of such references) to the Examiner for his independent review and consideration.

After reviewing the references, the Assignee believes that none of these references taken either alone or in combination with other references of record anticipates or renders obvious any of the pending claims in the present application. In particular, the Assignee respectfully submits that none of the cited references teaches or even suggests at least the limitation that "the computer gaming program executed on the server/host computer separates input and output streams at an application layer of a protocol stack, and redirects the input and output streams over the communication pathways to the client/terminal computers via the server/host interface program and the client/terminal program."

Accordingly, consideration and allowance of all pending claims of the present application in light of the newly cited references are respectfully requested.

PAYMENT AND/OR AUTHORIZATION TO CHARGE FEES:

☐ Please charge _____ Deposit Account No. 15-0665 for the above fee(s).
